

Portable Cloud

Enabling portable cloud/cluster capacity using Micro-Modular Data Center as logistical platform

- Reduce Production time from 3 months to 1 day
- Eliminate Bandwidth Leasing Costs
- Reduce “Cloud Rental” Costs

Current Workflow

Rent time: 3 months

Cloud Datacenter

Production Bottleneck

Project in need of supplemental computer capacity

MMDC enabled Workflow "Cloud Onsite"

Rent time: 1 day

20X Production Acceleration

- Local deployment of compute capacity eliminates remote connective to offsite data center
- Increase connection speed to "cloud data center" by deploying onsite

Project in need of supplemental capacity

Portable Cloud "Datacenter"
